REDDING SCHOOL DISTRICT BOARD CANDIDATE APPLICATION

1. My wife Stacy and I have been married for ten years. We have two daughters age 5 and 3 that will both be students of the Redding School District through eighth grade.

I grew up in Redding, graduated from Enterprise High School, obtained a BS in Mechanical Engineering from UC Davis, and I worked as an engineer for three years before deciding to change careers. I enrolled at UOP School of Dentistry and received a Doctor of Dental Surgery degree.

I have a private practice here in Redding that I started four years ago. I have also worked for other community clinics in the area (Shasta Community Health, Trinity Hospital, Hill Country Community Clinic, and Northern Valley Indian Health) as clinics have had need and I've had spare time. Currently I am working mainly at my private office, I give an average of one day a week to Shasta Community Health, and I do about a day a quarter with Trinity Hospital helping with chart reviews.

I have participated in the last four Give Kids a Smile days providing free dental treatment to needy children (this year I participated in both Redding and Red Bluff). My wife and I are becoming more active at Cypress Elementary volunteering for different functions. Last year I provided all the kindergarten screenings for the students at Cypress free of charge.

2. I would like to be on the Redding School District Board of Trustees for several reasons. I have found my volunteering in the community and at Cypress school to be very rewarding and I'd like to do more for the school. My two daughters will be attending schools in the district for the next eleven years and I think it's important that they receive the best education possible.

My family has lived in Redding for over 100 years. When my wife and I had to decide where we wanted to raise our children and start a business, Redding was our only choice. I want to see our community continue to grow and improve and I think our children's education is a good place to start.

To be fully transparent, I have to admit I found out about the vacancies in the board as a result of the press surrounding Mr. and Mrs. Stolz. I am not the type to point fingers or place blame, but I do think I can help the board work through these issues so the focus can return again to our children's education. As I tell my patients, I am not there to make them feel guilty about their current problem, I'm there to help make them better and keep the problem from recurring.

Thank you for your consideration.
